CHINMAY PATIL

Researcher & Freelancer | Web3 Blockchain Developer | Cyber Security Student

thechinmay07@gmail.com | +91 8217645438 | Bengaluru, India | chinmay.io
Chinmay_io | thechinmay07 | 0xali3n | devfolio.co/@Chinmay_io

A curious mind passionate about Cybersecurity, Blockchain, and now diving into AI—excited about blending these technologies to build innovative, secure systems. I'm always exploring deeper concepts of the internet and eager to contribute meaningful innovations. Outside the digital world, I'm a state-level handball player, part of my university's blue team, and a travel enthusiast who loves new experiences.

EDUCATION

B.Tech in Computer Science

KLE Technological University Hubli

Dec 2021 – June 2025 | Hubli

EXPERIENCE

Full Stack Intern

Pravinya Infotech

Jan 2025 – May 2025 | Hubli

- Worked on full stack features using React, Node.js, and MongoDB integrated GenAI tools and APIs.
- Built AdGenAI – an AI-powered tool for auto-generating ads and posters using Gemini APIs.

Co-Founder and CEO

TrackWallet.in

Dec 2023 – May 2025 | Hubli

- Uncovered hidden layers of cryptocurrency transactions by leveraging advanced analysis tools to trace and understand complex blockchain networks with precision.

PROJECTS

Project 1

Network Log Visualizer | Github

- Built a Flask web app to visualize network logs and detect anomalies like DDoS attacks using machine learning.
- Simplified threat detection by presenting clear, actionable insights from large-scale logs through an interactive Python-based interface.

Project 2

SupraScan.Fun | Github

- Built SupraScan.Fun — a blockchain explorer for the Supra network to track assets, transactions, and liquidity pools.
- Integrated developer-friendly APIs for real-time blockchain data access and seamless application integration.

Project 3

AdGenAI Generator | Github

- Designed AdGenAI – an AI-powered platform that generates high-quality advertisements and posters from user prompts and product images.
- Leveraged Gemini AI, Imagen3, and prompt engineering to automate ad creation with real-time editing, brand alignment, and fast performance.

Project 4

CryptoLuck Casino | Github

- Enabled anonymous and secure gameplay without KYC, ensuring user privacy and data protection.
- Developed provably fair games using smart contracts to guarantee transparency and prevent fraud.
- Offered a global gaming platform featuring Mines, Lucky Wheel, and Prediction Market with instant payouts and no regional limits.

Project 5

Imagine NFT | Github

- Imagine NFT is a decentralized NFT creation and marketplace platform powered by AI and SUI blockchain.
- Users can simply describe their ideas, and AI will generate both a description and an image, allowing them to mint, list, and sell NFTs seamlessly.

Project 6

W3Chat.io | Github

- Developed W3Chat.io – an AI-powered Web3 assistant enabling natural language and voice-driven blockchain interactions.
- Integrated multi-chain support (Base, Arbitrum, EigenLayer) with smart contract automation for seamless swaps, bridging, and batch transfers.
- Deployed scalable, secure smart contracts using Base Agent Kit, OnchainKit, and CDP tools across major testnets like Base and Arbitrum Sepolia.

SKILLS </>

Programming Languages

C | C++ | Python | Javascript

Cyber Security

Nmap | Burp Suite | Metasploit | Hydra | Kali Linux

Blockchain

Solidity | NFTs | De-Fi | Trading | DAO

Web Technologies

Next.js | React | Node.js | Tailwind CSS | Postman

Core Concepts

Computer networks | OOPs | DSA

ACHIVEMENTS

Runners Up - DevHack2023 | Linkedin

Dec 2023 — Bengaluru

Built a React-based Web3 app for DefiChain with interactive, reward-driven quests to boost user engagement and ecosystem participation.

Grand Finale – Smart India Hackathon 2023 | Linkedin

Dec 2023 — Amity University, UP

Developed tools to track illicit crypto activity by de-anonymizing dark web and blockchain transactions.

Winner – Hacker House Goa 2024 | Linkedin

Aug 2024 — Goa

Solved trust and privacy issues in online casinos by enabling anonymous, decentralized gameplay without jurisdictional restrictions.

3rd Place – Supra Movers Hackathon | Twitter

Jan 2025 — Online

The premier blockchain explorer for the Supra network. Track assets, pools, and transactions with ease.

2nd Round – EthGlobal Agentic Ethereum | EthGlobal

Feb 2025 — Online

Meet Worlds First All-in-One AI-Agent for Web3 Simplifying blockchain interactions with natural conversations

CERTIFICATIONS

eJPT Junior Penetration Tester

INE Security

Nov 2024

- Hands-on, entry-level Red Team certification simulating real-world penetration testing scenarios.
- **Certificate Link:** View

The Complete 2024 Web Development Bootcamp

UDEMY

June 2023

- Become a Full-Stack Web Developer with just ONE course. HTML, CSS, Javascript, Node, React, PostgreSQL, Web3 and DApps
- **Certificate Link:** View

Google Cybersecurity Specialization

Coursera

Oct 2023

- Completed the Google Cybersecurity Certificate covering 8 hands-on courses, including Python, Linux, SQL, SIEM tools, IDS, and risk management for entry-level cybersecurity roles.
- **Certificate Link:** View

ICSI | Certified Network Security Specialist (CNSS)

icsiglobal

Aug 2020

- International CyberSecurity Institute Certified Network Security Specialist.
- **Certificate Link:** View

CONTRIBUTIONS

Begginer Hack Book

Compiled a beginner-friendly Red Teaming handbook covering certifications, pentesting techniques, commands, tools, and practical guides for Windows, Linux, exploitation, and web hacking.
