PROFILE

Full-stack engineer building reliable software across AI-assisted interfaces, secure backend systems, and blockchain products. I focus on production-minded architecture, measurable user impact, and clear technical documentation. Targeting Germany-based Master's opportunities and software internships/jobs with strong engineering depth.

EXPERIENCE

Anthe Labs Pvt. Ltd. — Co-Founder | 2025 — Present
Bengaluru, India

- Co-founded and scaled Anthe from hackathon prototype to registered startup, leading a 5-member cross-functional team.
- Architected core Aptos-based social trading flows: real-time copy execution, wallet transparency, and risk analytics.
- Owned end-to-end roadmap across smart contract features, growth experiments, and product delivery.

Pravinya Infotech — Intern, Full Stack ML Developer | Jan 2025 — May 2025
Hubballi, Karnataka, India

- Built AdGenAI using React + Flask + MongoDB to automate campaign poster and ad generation workflows.
- Integrated Gemini and Imagen 3 APIs for prompt-driven creative generation from raw product assets.
- Implemented cloud asset handling with AWS S3 and resilient API error management for team use.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science — KLE Technological University
Focus: secure systems, software engineering, data structures & algorithms, applied AI.

LANGUAGES

English: Full Professional Proficiency (IELTS B2) | German: A1 (actively learning, targeting A2 by Winter 2026) | Kannada: Professional working proficiency | Hindi: Professional working proficiency

SELECTED PROJECTS

AdGenAI — AI Powered Advertisement and Poster Generator

- Built prompt-to-poster pipeline integrating Gemini AI + Imagen 3 for fast campaign variant generation.
- Implemented reusable asset storage flow with Amazon S3 and practical team-oriented review workflow.

W3Chat.io — AI Agent for Web3 Actions

- Built conversational interface to execute transfers, swaps, bridges, and automation triggers across chains.
- Integrated AgentKit/OnchainKit approach for practical wallet actions with simplified UX.

Zory — Web3 Social Platform on VeryChain

- Delivered connected social feed + quest + reward loops with gasless-style interaction paths.
- Maintained contract-aware accounting for reward and token operations.

CryptoLuck Casino

- Implemented privacy-first casino prototype with provably fair logic and wallet-based payout patterns.
- Shipped multiple game loops with fast onboarding design for global users.

ZeroTrace — Encrypted Messaging DApp

- Architected Rust/Actix backend for secure messaging state handling and protocol-aligned transitions.
- Designed swap-ready interfaces for advanced cryptographic module integration.

AlgoCash — Digital Cash Management on Algorand

- Built encrypted note issuance and claim workflow with contract-level operational scripts.
- Created end-user claim interface to simplify redemption path.

COMPETITIONS & ACHIEVEMENTS

- VERY Hackathon (Winner, $1,000) — Zory on VeryChain.
- Build on Aptos Hackathon (2nd runner-up, $1,500) — Copy-trading flow using Decibel infrastructure.
- CTRL+MOVE Hackathon (Bounty Winner, $2,500) — Social Trade for Kana Perps track.
- Supra Movers Hackathon (3rd place, $2,000) — SupraScan explorer and API flow.
- Hacker House Goa (1st, Diamante track, $3,000) — CryptoLuck casino prototype.
- DevHack 2023 (Runner-up $1,500 + Side Track $1,200) — DeFiChain.in learning and governance flow.
- Smart India Hackathon 2023 Grand Finale — de-anonymisation product for monitoring illicit cryptocurrency activity (NTRO track).
- Overall: $12,700+ prize pool, 8+ wins/podiums, 20+ hackathons entered.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript
Web & Frameworks: Next.js, React, Node.js, Flask, Tailwind CSS, Postman
Blockchain: Solidity, Aptos, Sui, DeFi, DAO, On-chain analysis
Cybersecurity: Kali Linux, Nmap, Burp Suite, Metasploit, Hydra, eJPT (INE)
Foundations: Computer Networks, OOP, DSA, MongoDB
